

Responsible and sustainable investment is fast becoming a mainstream function of good investment practice, resulting in better, more informed investment decisions.

Whether or not your organization captures the upside from good investment practice depends entirely on the skills and abilities of your team to effectively embed and integrate ESG considerations across your investment practices.

Even beyond investment teams, the rapidly growing expectations on responsible investors have increased the necessity for investors – from trustees, corporate affairs, marketing, sales and even call center staff – to understand the why and how of responsible investment.

**For these reasons, the RI Academy is pleased to announce the launch of [Responsible Investment Fundamentals](#), a new 3-hour intensive training course that addresses the basic principles of ESG and responsible investment for investment teams, corporates and beyond.**

The short course, delivered entirely online, clearly establishes the business case for responsible investment and sets out what good practice looks like - through key principles, real life case studies, and interactive engagement.

Training is a key plank to any comprehensive responsible investment strategy. The RI Academy can make starting this process easy. **That is why the RI Academy has been used by over 850 candidates across 26 countries.**

To ensure your organization is getting value from its responsible investment practices, it's critical that your teams understand where the responsible investment rubber hits the road in terms of managing risk and capturing opportunities.

**If you are interested in learning more about this or any of our courses, visit the RI Academy [website](#) or contact the team directly on +61 2 8228 8100 or [enquiries@riacademy.org](mailto:enquiries@riacademy.org).**

**Members of the Responsible Investment Association benefit from a 25% discount on all enrolments.**

Kind regards,

Simon O'Connor
